Reflection

Faiqah - System analysis and program development reflect continuous improvement in digital system ,these topics show how companies modernize and stay competitive.

Hanisah - SAP modules represent specialized business domains. While, master data is the foundation of accurate operations. Overall, Data analytics and data lakes extend SAP beyond transactions into insights.

Najwa - ICT professionals are strategic partners, not just support staff they build the infrastructure, manage the critical data, and drive the digital transformation necessary for global competitiveness.
